

# APPENDIX A: OFFICIAL SCORING REGULATIONS & GAME MECHANICS

## 1. Structure of Predictions

To participate in a Grand Prix scoring loop, players must submit their selections up to the official start time of Saturday Qualifying. Each submission requires inputs for:

- **Qualifying:** Predicted Top 3 finishing order (P1, P2, P3).
- **Pole Position Time:** Exact time prediction configured in Minutes, Seconds, and Milliseconds (MM:SS.mmm).
- **Race Podium:** Predicted Sunday Top 3 finishing order (P1, P2, P3).
- **Race Conditions & Prop Events:** Mandatory "Yes/No" selection for Rain and Physical Safety Car deployment, alongside an exact numerical integer for total Did-Not-Finish (DNF) classifications.

## 2. Point Allocation Matrix

### A. Saturday Qualifying Session

Points are awarded based on accuracy within the top three positions. Partial credit is granted if a predicted driver secures a podium spot but misses the exact slot.

- **Qualifying 1st Place (Pole Position):**
  - **10 Points** for an exact placement match.
  - **5 Points** if the chosen driver places 2nd or 3rd.
- **Qualifying 2nd Place:**
  - **8 Points** for an exact placement match.
  - **4 Points** if the chosen driver places 1st or 3rd.
- **Qualifying 3rd Place:**
  - **6 Points** for an exact placement match.
  - **3 Points** if the chosen driver places 1st or 2nd.

### B. The Pole Position Time (Tiebreaker Mechanic)

To qualify for timing points, a user's submission must accurately match the official baseline Minutes and Seconds of the Pole Position lap. Scoring is validated progressively from left to right:

- **Minutes & Seconds Match (Baseline):** 2 Points

- **Tenths of a Second Match (e.g., 1:22.3xx):** 7 Points total (2 Base + 5 Bonus)
- **Hundredths of a Second Match (e.g., 1:22.34x):** 12 Points total (2 Base + 10 Bonus)
- **Thousandths of a Second Match (Exact Precision 1:22.344):** 27 Points total (2 Base + 25 Bonus)

*Note: If the baseline Minutes and Seconds do not match the official FIA timing sheets, 0 points are awarded for this category, regardless of downstream millisecond numbers.*

### **C. Sunday Race Session**

The primary points pool is anchored to Sunday's final race classifications:

- **Race 1st Place (Grand Prix Winner):**
  - **25 Points** for an exact placement match.
  - **10 Points** if the chosen driver finishes on the podium (2nd or 3rd).
- **Race 2nd Place:**
  - **18 Points** for an exact placement match.
  - **8 Points** if the chosen driver finishes on the podium (1st or 3rd).
- **Race 3rd Place:**
  - **15 Points** for an exact placement match.
  - **6 Points** if the chosen driver finishes on the podium (1st or 2nd).

### **D. Race Conditions & Prop Variables (All-or-Nothing)**

No partial credit or margins of error are recognized for track event variables:

- **Rain Deployment (Yes/No):** 5 Points (*Subject to official FIA session reports confirming wet track parameters or wet tyre deployments*).
- **Physical Safety Car (Yes/No):** 5 Points (*Excludes Virtual Safety Car periods*).
- **Exact DNF Count:** 10 Points (*Must exactly match the final number of drivers listed as DNF on the official classification sheet*).

## **3. Maximum Standard Performance (Per Event)**

The ceiling score for a flawless, un-multiplied global prediction matrix stands at **129 Points**, distributed as follows:

| Scoring Segment            | Maximum Points Available |
|----------------------------|--------------------------|
| Qualifying Top 3 Positions | 24 Points                |

|                                 |                   |
|---------------------------------|-------------------|
| Perfect Precision Pole Time     | 27 Points         |
| Race Podium Top 3 Positions     | 58 Points         |
| Track Conditions & Prop Events  | 20 Points         |
| <b>Maximum Base Event Score</b> | <b>129 Points</b> |

#### 4. DigitAlb 2× Multiplier Token Policy

To ensure equity across the competitive lifecycle and safeguard tournament integrity for mid-season registrants, the integration of DigitAlb Active Subscriber credentials grants access to a limited, high-utility tactical mechanic:

- **Season Quota:** Verified active DigitAlb users receive exactly **three (3) Multiplier Tokens per calendar season**.
- **Execution:** A player must actively select and deploy a Multiplier Token prior to the Saturday Qualifying lock window. Retroactive deployment following the start of a session is strictly prohibited by system architecture.
- **Impact:** Activating a Token doubles (2X times) the user’s final calculated weekend score for that specific round, elevating the maximum single-weekend scoring ceiling to **258 Points**.
- **Non-Refundability:** Once a token is deployed and the lock window closes, it is permanently consumed, regardless of subsequent real-world race cancellations, technical retirements, or driver DNS events.
- The user will fill the credentials through the “Profile” section only once per season. After confirming, the user can choose to activate the 2X Multiplier from the “Prediction” section.

#### 5. Raiffeisen Boost 15+ Points Policy

- **Eligibility & Ownership Verification:** To unlock this scoring advantage, players must link an active a Raiffeisen Bank code sent from the Raiffeisen Youth App. The account must be issued under the identical legal name registered to the player’s F1 Predictor account. Secondary name validation or cross-account linking is strictly prohibited.
- **Operational Validation:** Verification is processed via the Raiffeisen Youth App and the Geek Room F1 Prediction website filling the credentials through the “Profile” section only once per season.

- **Scoring Impact & Frequency:** Once verified, the user is granted a flat bonus of **fifteen (+15) points** applied automatically to their final calculated score for **each Grand Prix round** of the calendar season.

## 6. Weekly Winner Selection & Prize Fulfilment Policy

- **Winner Selection & Tiebreaker Mechanic:** A maximum of exactly three (3) winners will be recognized per Grand Prix scoring loop based on the highest weekly scores achieved. In the event of a tie where two or more users secure identical weekly points, a definitive tiebreaker mechanic is enforced: the system will evaluate the total accumulated season points gathered up to that specific round. The participant with the highest overall season points total will break the tie and be awarded the victory.
- **Official Announcements & Communications:** The finalized weekly winners will be announced at the commencement of the following week. These results will be publicly displayed within the designated "Leaderboard" category. Furthermore, winning participants will receive a formal notification via direct email to their registered account address.
- **Territorial Limits & Address Validation:** Prize delivery is strictly restricted to physical addresses located within the territorial borders of Albania. The address provided during the initial account registration will serve as the default shipping destination. If a user's address is missing, invalid, or deemed incomplete, the platform administration will initiate contact via email to request the necessary updates.
- **Claim Window & Forfeiture:** Users contacted regarding incomplete shipping details are subject to a strict two-week (14-day) compliance window. Failure to reply and successfully update the physical address within this exact timeframe will result in the automatic and irrevocable forfeiture of the prize.
- **Logistics & Prize Integrity:** All eligible prizes will be dispatched via a private courier service, with all associated shipping and transit costs fully subsidized by Geek Room. Prizes are final and strictly non-negotiable; under no circumstances may a physical prize be substituted, exchanged, or converted into an equivalent cash value.
